

Tanner Nevill

Tanner Nevill is Vice President of Product Applications at Berkeley Lights. Working with multidisciplinary teams of scientists and engineers, he has played a key role in the development of many of the company's core technologies, specifically how they can be applied to antibody discovery and cell line development. Tanner obtained his Ph.D. in bioengineering from UC Berkeley and previously held positions at GlaxoSmithKline and Fluxion Biosciences. With over a dozen publications and over two dozen patents, Tanner has been involved in life science technology and product development for over 12 years.
